Ref: DPL/07/13

The DP-L series models are very productive digital duplicators with reliable and user friendly operations which produce excellent prints in a compact design. The DP-L500 and DP-L200 are A4 models whereas the DP-L220 and DP-L520 are B4 models. The DP-L500 and DP-L520 are equipped with a flatbed scanner whereas the DP-L200 and DP-L220 have an automatic document feeding scanning mechanism.

### High Quality Print

The DP-L series can scan and print at a resolution of 300 x 600 dpi, reproducing originals to exceptionally high standards. The operator can scan via the flatbed scanner on the DP-L500/DP-L520 or via the ADF on the DP-L200/DP-L220. Alternatively you can print direct from a PC, Mac or via a network with the optional USB 2.0 connectivity.

### 3 Image Modes

The DP-L series is equipped with 3 image modes: Photo Mode, Text Mode and Text/Photo Mode. As soon as an image mode has been selected, the Duprinter will automatically adjust its setting to ensure the print quality is at its best.

### Feeding Mechanism

The feeding system is the heart of the DP-L series: It can reliably and consistently feed a wide range of stocks from carbonless to cards as well as postcards up to 297 x 364mm. It can handle paper thicknesses from 45 to 210gsm. Superb paper handling is achieved through Duplo's tried and tested automatic lift-up and paper delivery, the unique triple feed wheels for accurate feeding and the fan and belt paper ejection system for reliable delivery.

### Colour Printing

Create added value to your documents by adding a spot colour. A variety of coloured inks are available on the whole Duprinter range. A pantone colour service is also provided should a specific colour be required.

### Reduction and Enlargement

Document size can be enlarged and reduced on the DP-L series. Reduction: 70%, 81% and 86%, Enlargement: 115%, 122% and 141%.

### Environmentally friendly

Like all the Duprinters, the DP-L series is extremely environmentally friendly. It uses water based inks and produces no ozone or emissions.

### Productivity

The DP-L series can produce 130 prints per minute without compromising the quality of printing. The master making process on the DP-L500 and DP-L200 is 21 and 24 seconds respectively. To ensure maximum productivity and less user intervention the DP-L series is equipped with the feeding and stacking capacity of 1300 sheets (64gsm).

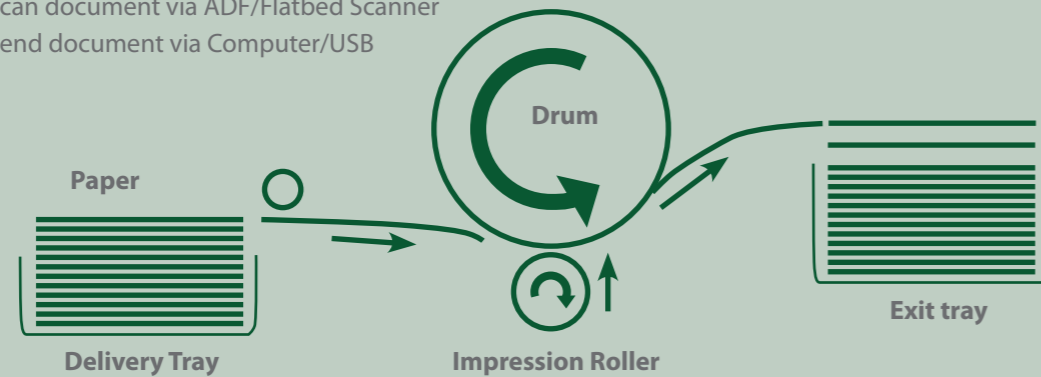

### User ID Manager

The User ID Manager is an excellent security feature. It is also a great way to control spending within a company.
